Pharmacological aspects of S-ketamine in the equine species

Graduate School for Cellular and Biomedical Sciences
University of Bern
PhD Thesis

Submitted by
María Paula Larenza
from Buenos Aires, Argentina

Thesis advisor

Prof. Dr. Regula Bettschart-Wolfensberger
Section Anaesthesiology, Equine Department,
Vetsuisse-Faculty of the University of Zurich

Table of contents	Page
1. Abstract	3
2. Introduction	4
2.1. Anesthesia related mortality in horses and the potential beneficial role of S-ketamine.	4
2.2. Importance of stereochemistry in anesthesia.	6
2.3. Overview of ketamine and its use in equine anesthesia.	8
2.4. Ketamine enantiomers	10
2.5. Cardiovascular and respiratory effects of ketamine.	11
2.6. Analgesic effects of ketamine.	12
2.7. Ketamine pharmacokinetics in horses.	14
2.8. Metabolism of ketamine.	16
2.9. Pharmacology of S-ketamine in equines: outline of fundamental research studies.	19
2.9.1. Stereoselective pharmacokinetics of ketamine and norketamine after the administration of racemic ketamine or S-ketamine to Shetland ponies.	20
2.9.2. Impact of sampling site on the disposition of S-ketamine and R-ketamine after single intravenous administration of the racemic mixture in Shetland ponies under isoflurane anesthesia.	29
2.9.3. Cardiovascular and respiratory effects of racemic ketamine or S-ketamine administration in Shetland ponies sedated with xylazine or anesthetized with isoflurane in oxygen.	30
2.9.4. Antinociceptive effects of a low-dose infusion of racemic and S-ketamine in standing ponies.	33
2.10. Pharmacology of S-ketamine in equines: hypotheses.	36
3. Results	37
3.1. Evaluation of anesthesia recovery quality after low-dose racemic or S-ketamine infusions during anesthesia with isoflurane in horses.	30
3.1.1. Summary	39
3.1.2. Introduction	40
3.1.3. Materials and Methods	41

3.1.4. Results	46
3.1.5. Discussion	52
3.2. Cardiopulmonary effects, anesthesia recovery quality and pharmacokinetic profile of low-dose S-ketamine infusions in horses anaesthetized with isoflurane.	56
3.2.1. Summary	57
3.2.2. Introduction	58
3.2.3. Materials and Methods	58
3.2.4. Results and Discussion	64
3.2.5. Conclusions	71
3.3 Appendix and footnotes	72
4. Discussion and outlook/perspectives	74
4.1. Implications of the stereoselective pharmacokinetic analysis of ketamine in horses.	74
4.2. Disposition of S-ketamine as part of the racemic mixture or as the single enantiomer after single bolus injection or constant rate infusion.	75
4.3. Importance of the co-administered drug on the pharmacokinetics of ketamine enantiomers after single bolus administration.	77
4.4. Importance of the sampling site on the pharmacokinetics of ketamine.	79
4.5. S-ketamine effects on the cardiovascular and respiratory systems in anesthetized and standing horses.	82
4.6. Antinociceptive effects of S-ketamine in horses.	85
4.7. S-ketamine effects on the quality of anesthesia in horses.	87
4.8. Final conclusions and perspectives.	89
5. Reference list	91
6. Abbreviations	107
7. Curriculum Vitae and publications	108
7.1. Curriculum Vitae	108
7.2. Related publications	109
8. Acknowledgments	110
9. Declaration of originality	111
